
Summary

Multilingual business professional (English/Mandarin/Cantonese) with 5+ years of experience in strategic consulting, talent advisory, and data analytics across APAC markets. Currently completing an MS in Business Analytics at UC San Diego (graduating June 2026), combining deep cross-functional business experience with applied skills in machine learning, predictive modeling, and data visualization. Proven ability to build strong stakeholder relationships, translate complex data into actionable insights, and drive business impact across pharmaceutical, healthcare, and finance industries. Available to start July 2026.

Education

Master of Science in Business Analytics, Rady School of Management 06/2026

University of California, San Diego | Rady Incoming Scholarship (\$22,500) | Courses: Machine Learning, Customer Analytics, Predictive Analytics, Applied Statistics, SQL & ETL

Bachelor of Business Administration, Finance, International University in Geneva 07/2019

Bachelor of Science in Business Management (Double Degree), University of Plymouth, United Kingdom

Professional Experience

Data Scientist, FairMoney Capstone Project, San Diego, CA 03/2026 – Present

Nigerian microfinance platform; causal analysis of interest rate policy on borrower default behavior.

- Applied Logistic Regression and Propensity Score Matching (PSM) across 3 borrower segments to quantify the causal effect of interest rates on loan default probability, controlling for risk decile, tenor, and loan amount.
- Incorporated Expected Credit Loss (ECL) modeling to assess revenue impact; identified top-up customers as most rate-sensitive (+12.25pp default spread), with value destruction beyond Q2 rate bucket.
- Delivered segmented pricing recommendations to FairMoney's data science leadership; identified 60–90-day tenor as the dominant risk factor with a 31.2% default rate.

Recruitment Specialist, Sanofi, Taipei, Taiwan 03/2023 – 07/2025

Pharmaceutical MNC; strategic business partner across 6 APAC markets covering pharma, healthcare, and finance divisions.

- Partnered with C-suite and senior business leaders on headcount planning, talent strategy, and organizational effectiveness across 6 APAC markets, managing 50+ concurrent requisitions with consistent on-target delivery.
- Developed market intelligence reports analyzing talent supply, compensation benchmarks, and competitive landscape across APAC; translated findings into executive-level recommendations for senior leadership.
- Analyzed recruitment pipeline data in Greenhouse and Workday to identify bottlenecks and inefficiencies; implemented data-driven process improvements that measurably reduced hiring cycle time.
- Built and maintained trusted relationships with senior stakeholders across pharmaceutical, healthcare, and finance divisions, acting as strategic advisor on workforce planning and organizational strategy.
- Championed diversity and inclusion in hiring practices across all markets, ensuring diverse candidate slates and equitable assessment processes for every engagement.

Recruitment Consultant, Platinum International Consultant, Taipei, Taiwan 07/2020 – 02/2023

HR advisory firm; delivered strategic consulting and talent solutions for 30+ corporate clients across APAC.

- Served as trusted business advisor to 30+ corporate clients across engineering, IT, and business functions, diagnosing workforce gaps and delivering people strategies that supported organizational growth.
- Conducted competitive market analysis on compensation trends, talent availability, and industry benchmarks, equipping clients with actionable intelligence to inform strategic workforce decisions.
- Designed competency-based evaluation frameworks and led full-cycle executive searches, achieving a 95% client satisfaction rate across all engagements.
- Coached and mentored 3 junior consultants, implementing standardized workflows and performance metrics that elevated team output quality and consistency.

Analytics Projects

Creative Gaming: Uplift Modeling | *Python, Logistic Regression, Random Forest, XGBoost*

- Built a two-model uplift framework to estimate incremental treatment effects of advertising on customer conversion; constructed Qini curves to evaluate targeting performance and identify high-value customer segments.
- Translated model outputs into targeting recommendations, prioritizing customers with the highest predicted incremental lift to maximize campaign ROI.

Pentathlon: Next Product to Buy (NPTB) | *Python, Logistic Regression, Polars*

- Built a customer-level propensity model to predict which product category each customer was most likely to purchase next; optimized marketing message assignment across 60,000+ customers by converting predicted probabilities into expected profit scores.

Netflix Pricing Strategy Analysis | *Python, Panel Regression, Fixed Effects Modeling*

- Analyzed pricing elasticity across 4 global regions using regression with fixed effects; estimated demand sensitivity and translated findings into differentiated regional pricing recommendations.

Skills & Competencies

- **Data & Analytics:** Python (Pandas, NumPy, Scikit-learn), R, SQL, ETL, Git, predictive modeling, machine learning, A/B testing, causal inference
- **BI & Reporting:** Power BI, Tableau, Excel (pivot tables, dashboards), executive presentations
- **Business & Strategy:** Market intelligence, competitive analysis, stakeholder advisory, workforce strategy, cross-functional collaboration, APAC market expertise
- **Tools:** Greenhouse, Workday, Microsoft Office Suite
- **Languages:** English (Fluent), Mandarin (Fluent), Cantonese (Fluent), French (Basic), Korean (Basic)
